SHOPPING BAGS

Shopping bags, also with a flat handle, made of white or brown paper with density of 60 to 100 gsm .

- single-ply bags
- individual imprint in up to eight colors (the minimum print run for bags with an imprint is 20,000 pcs depending on the size)
- bag width: 180 - 460 mm
- bag bottom width: 70 - 230 mm
- bag length: 360 - 770 mm

We introduced a product innovation into our offer. A significantly improved product:
A heavy duty paper bag with a flat bottom and flat handles.

CATERING BAGS

We produce the most popular paper bag in Poland
for catering and delivery.

- The 320x220x250 mm catering bag is commonly used where a 220 mm wide bottom is required for wider menu boxes.
- The bag is made of bleached and unbleached 100% KRAFT cellulose papers. Our raw material suppliers are European leaders in the paper industry, which guarantees the highest quality of raw materials.
- On special request, the bag height can be increased to 350 mm.
- An custom flexographic imprint in up to eight colors can be made with water-based inks..
- The minimum print run for printed catering bags is 18,000 pcs.

BIO PAPER BAGS

The BIO paper bags are made of highly moisture-resistant and 100% unbleached recycled paper, which is environmentally friendly.

We offer the BIO paper bags in the size of 220x140x360 mm and with the capacity of 10 l. The bags can be made of paper of 3 different densities:

- 70 g/m²;
- 70 g/m² WS (paper with increased water resistance); and
- 80 g/m² WS (paper with increased water resistance).

They are an environmentally friendly product. Designed for hygienic and environmentally friendly disposal of biodegradable waste. The eco-friendly paper bags are manufactured in compliance with the strictest environmental regulations, as evidenced by the Blue Angel certification. They can be disposed of with compost or in the organic waste garbage bin.

FOOD PACKAGING PAPER

We offer paper from well-known Polish and European paper mills.

- PE-coated paper in sheets and rolls, with individual imprints possible.
- Bleached paper 30 g/m², 40 g/m² (ream, roll, sheet)
- Non-bleached paper 40 g/m², 50 g/m² (ream, roll, sheet)
- Greaseproof paper 50 g/m²

PACKING PAPER

We offer paper from well-known Polish and European paper mills.

Packing paper:

- Recycled paper 90 g/m² (roll, sheet)
- Packing paper PD 45 g/m² (ream, roll, sheet)
- Recycled paper bags 0.25 kg to 5 kg packed under 10 kg

ALUMINUM TRAYS AND PANS

The high degree of recovery and reclamation of aluminum means that products made from this material can be recycled and at the same time can retain their original characteristics for a long time.

Benefits of using aluminum trays and pans:

- Because they are single-use products, it is easier to the kitchen clean.
- We offer products that meet EU requirements for direct contact with food.
- Very high temperature resistance, up to 350 °C.

Aluminum pan, rectangular, 1000 ml

- Dimensions: 234x103x61.5 [LxWxH] (mm)
- Manufactured in different thickness versions: from 50 to 70 mic

Aluminum barbecue tray, large

- Dimensions: 345x225x24 [LxWxH] (mm)
- Manufactured in different thickness versions: 60 and 70 mic

Aluminum barbecue tray, small

- Dimensions: 280x220x15 [LxWxH] (mm)
- Manufactured in different thickness versions: 55 and 60 mic

We realize that a well-organized company that wants to be successful on the market must be competitive and have clearly defined goals. Therefore, our quality policy results directly from the vision and mission of the company.

Vision:

To become a European leader in the industry of producers of paper packaging for food.

Mission:

To produce food packaging that is safe for people and the environment and that meets customer requirements.

To achieve this, we are guided by the following principles in our business:

- *we make sure that the packaging we offer meets the health safety requirements resulting from the BRC Global Standard for consumer products and the legal regulations of the countries where they are offered for sale*
- *taking care of good relations with our clients, we treat each of them individually, and the continuous analysis of their needs allows us to adjust our commercial offer to their requirements*
- *we are constantly expanding the range of our products and improving their quality*
- *we work only with suppliers who guarantee the appropriate quality of the raw materials supplied, as well as attach great importance to ecological methods of producing these raw materials*
- *we employ qualified and experienced staff who perform their work with commitment and comply with the quality and hygiene requirements in force*
- *we constantly invest in modern production technologies and production infrastructure*
- *both the management and employees of the company are committed to meeting the requirements and systematically improving the effectiveness of the implemented management system based on the requirements of both the BRC Global Standard for consumer products and the PN-EN ISO 9001 standard.*
